ABOUT US

M/s Manjit Power & Projects Private Limited (Formerly known as Manjit Construction Company) was established in 2015 as an **Engineering, Procurement & Construction**. Over the last Five Years the company has diversified and broadened its scope into **Extra High Voltage Substation and Transmission lines** including **Civil, Electrical & Instrumentation**.

Innovate, Collaborate and adapt to the changing industry demand.

Be ethical, market-centric, value-driven and develop customer satisfaction excellence.

To focus and enhance the capability to execute.

- ✓ EPC Solar Generation Plant
- ✓ EHV Transmission Lines
- ✓ EHV Sub-Stations (Civil and Electrical)

SOLAR

In line to our focus on Renewable Energy sector, MPPPL has made a move to providing Solar EPC services for large solar PV projects developed by private players and roof-top PV solutions for Industrial and Commercial consumers. With a belief in absolute reliability, top quality and the long-term success of renewable energies, we and our project managers, engineers and designers are looking to set new standards in the solar industry.

POWER TRANSMISSION & DISTRIBUTION

MPPPL undertakes EPC projects of HV/EHV Transmission & Distribution Systems from concept to commissioning on turnkey basis for Transmission Lines & Substations from 11 kV up to 220 kV level as per IEC standards and continue to deliver the same quality and excellence in all our works which are spread across various regions. We have strong in-house design & engineering capabilities for electrical as well as structural and civil works and an experienced project management team to deliver these projects as per customer's specific requirements.

HYDRO POWER O&M

Innovative approaches to the operations and maintenance (O&M) of hydropower facilities are needed to ensure optimal performance. Poor operations and maintenance, through a lack of investment, inadequate training or outdated approaches, can cause high forced outage rates, performance losses and increased operating costs. This can lead to lost energy production, reduced revenues and in some cases result in dam safety and environmental concerns.

PRODUCT

MPPPL offers a wide range of power utility equipment from Low Voltage to Medium Voltage to High Voltage to Extra High Voltage such as Switchgear Panels, Surge (Lightning) Arresters, Disconnecting Switches (Isolators), Current & Voltage Transformers, Relay and Control Panels, Cables, Polymeric (Composite) Insulators etc. which are all employed in High Voltage Substations for electrical power transmission and distribution equipment ranging from 415V to 245 kV.

VALUE ADDED SERVICES

We firmly believe that after sales service is an integral part of the power industry as it helps to make sure the customers are satisfied with the products and services of the organization. Continuous improvement of products and maintenance of Substation is important for longevity of products. Hence, MPPPL offers 'Annual Maintenance Contracts' for Substations upto 220 kV alongside various services that include repair of Power & Distribution Transformers, Maintenance & Testing of HT Switchgears, Dehydration of Transformer Oil, SF6 Gas fill up, Retrofitting of Electromechanical relays, Programming, Configuration & Testing of Numerical relays etc.
